

Plan of measures against sexual harassment in public transport

Analysis of actions to be implemented to prevent sexual harassment in public transport

June 202G

Action plan: lines of action and measures

The benchmark analysis, field work, focus groups and different follow-up meetings with the project team have identified 5 lines of action (LA) in the prevention of sexual harassment and 18 measures that expand on these.

Action plan: lines of action and measures

The Action Plan is divided into 5 lines of action, aligned with the benchmarking and protocol carried out:

LA1. Governance

LA2. Design and operations

LA3. Prevention and support systems

LA4. Sensitisation and raising awareness

LA5. Technological tools

Action plan: lines of action and measures

In order to outline each LA, the following has been produced....

- · A fact sheet for each line of action, identifying:
 - A brief description for each LA
 - Their aims
 - A brief description of each measure

- A fact sheet for each measure, detailing:
 - A brief description
 - The purpose of the measure
 - The actions to be carried out
 - The implementation period
 - ▶ The agents (responsible and involved)
 - ▶ The assessment of the economic cost

LA1 Measures

1.1. Government <u>policies and</u> <u>strategic plans</u>

- Integrate gender mainstreaming into the mobility planning process.
- Include gender impact assessments in all mobility and public transport plans and measures.
- Include a gender clause in public tenders.
- Have a team of specialists to support gender mainstreaming in future projects in the transport and infrastructure sector.

1.2. Management structures

- Set up a Monitoring Committee which will assess and supervise compliance with a uniform and comprehensive protocol for addressing sexual assault in the mobility and public transport system.
 - The Committee will organise itself internally to handle the technical aspects.
 - The Committee will be responsible for producing an annual monitoring report.

LA1 Measures

- 1.3. Expansion of knowledge and diagnosis of the situation
- Conduct regular gender-sensitive surveys on mobility and travel patterns.
- Have reporting and monitoring tools to see the evolution of the policies implemented against sexual harassment. One of them would be to conduct regular surveys to characterise sexual harassment on public transport.
- Analysis of the mobility of women and the most vulnerable groups.
- 1.4. <u>Empowering women in the sector</u>
- Design specific measures to protect female public transport workers from sexual harassment.
- Create a women's network in the mobility sector to promote empowerment measures.
- Carry out a campaign to raise the visibility of women in the transport and mobility sector.
- Hold conferences and promote debates on the role of women in mobility and its impact on their daily lives.

Description	Establish the necessary changes in the design of public transport infrastructures , spaces , vehicles and operations to ensure that transport services meet the specific and common needs of all users, and promote public transport with equal conditions.
LA2 Aims	 Establish a planning and design of the transport system taking into account the needs of women in the sector. Design public transport together with public space to improve and tackle the perception of insecurity. Adapt infrastructure and vehicles to make public transport more inclusive.

LA2 Measures

2.1. **Gender-sensitive** planning

- Integrate gender mainstreaming into the design of city planning to make cities more inclusive and in order to reduce sexual harassment.
- Apply gender mainstreaming in transport and mobility planning and incorporate gender guidelines and criteria.
- Promote a public transport infrastructure that is inclusive and sensitive to gender and functional diversity.
- Incorporate citizen participation of public transport users in the planning process.

LA2 Measures

2.2. <u>Integration of public transport</u> with other uses of public space

- Conduct gender-sensitive risk assessments when planning the location of public transport stops.
- Promote intermodality between modes of transport and ensure safety are among the main objectives of the spaces to help use public transport resources.
- Promote flexible and intermediate bus stops at night.

2.3. <u>Safe, accessible and well-lit infrastructures</u>

- Improve accessibility from a gender perspective at stations, platforms and bus and train stops to increase the feeling of safety and comfort when travelling.
- Where appropriate, redesign public transport stops following inclusion and equality standards, to improve the feeling of safety.
- Real-time information on bus movements to avoid unnecessary waiting at bus stops.

Description	Promoting prevention and support systems for sexual violence on public transport that lay the foundations for coordinated and appropriate action, based on the logic of non-revictimization and recovery.
	Define the persons responsible for tackling gender-based violence on public transport.
	Ensure public transport staff are aware of how to deal with gender-based violence.
LA3 Aims	Enable intervention against sexual harassment on public transport.
	Promote public awareness in identifying sexual violence.
	Guarantee the confidentiality of people in situations of gender-based violence.

3.1. Uniform and comprehensive

3.1. Uniform and comprehensive protocol for addressing sexual assault in the mobility and public transport system.

- Ensure harmonisation of the different public transport operators by creating a uniform and comprehensive protocol for addressing sexual assault in the mobility and public transport system.
- Ensure that each transport operator has a person in charge of implementing the uniform and comprehensive protocol for addressing sexual assault in the mobility and public transport system.
- Designate the person in charge of the uniform and comprehensive protocol for addressing sexual assault in the mobility and public transport system for each of the public transport work shifts.
- Adapt the action cycle of the uniform and comprehensive protocol for addressing sexual assault in the mobility and public transport system to the specific needs of each public transport.
- Coordinate a network of action in public transport against sexual harassment.
- Train public transport staff in the uniform and comprehensive protocol for addressing sexual assault in the mobility and public transport system.

LA3 Measures

- 3.2. Promoting the role of prevention agents
- Promote sexual harassment prevention agents on public transport, trained in gender and in dealing with male violence on important dates and major events.
- Creation of a gender-sensitive intervention group specialising in intervention against male violence on public transport.
- 3.3. Warning and support systems
- Increase the presence of CCTV cameras in public transport, transfers, lifts and stops, and other less crowded, poorly visible and/or unlit spaces.
- Promote warning, assistance and rescue systems at and inside public transport stops.
- 3.4. Victim support and recovery
- Set up a space for sexual violence support and for receiving public transport complaints at the main stations of each mode of public transport.
- Follow up and respond to complaints received, providing the status of the complaint and the progress of the case.
- · Facilitate channels for reporting sexual harassment on public transport.
- Promote the creation of a database with the available territorial resources for women and LGBTI people.
- Produce infographics of the uniform and comprehensive protocol for addressing sexual assault in the mobility and public transport system that indicate how to act in the event of sexual harassment.

LA4 Measures

4.1. Training of staff, administration and society

- Develop tools to train public transport staff on sexual harassment, including those responsible for managing and planning different public transport operators.
- Gender training for staff working on the different modes of public transport, including those responsible for managing and planning the different public transport operators.
- Specific training in addressing sexual violence for public transport security personnel.
- Organise and promote gender workshops with specific transport themes aimed at all sectors involved, looking ahead to the future, analysing the problems and sharing experiences.

LA4 Measures

4.2. Awareness-raising campaigns

- Information and awareness-raising campaigns aimed at citizens, focusing on the rejection of sexual violence and highlighting the existence of the uniform and comprehensive protocol for addressing sexual assault in the mobility and public transport system.
- Incorporate raising awareness on sexual harassment in mobility education projects, with an emphasis on the responsibility of the men who harass.
- Promote awareness-raising actions focused on men, with the aim of making them feel challenged and reject the sexual violence that can occur.
- Raise awareness of the importance of responding to anyone who may be a victim of sexual harassment, to encourage community intervention.
- Remove all sexist advertising from the entire public transport system.

4.3. Victim support and recovery

· Promote communication campaigns on existing sexual harassment prevention and action measures.

Description	Promote the use of technological tools available to citizens to encourage reporting sexual harassment situations and enable public transport users to connect with public transport providers.
LA5 Aims	 Encourage reporting sexual violence on public transport. Encourage women and LGBTI people who experience sexual harassment on public transport to report it. Make it easier for people who experience sexual harassment on public transport to report such situations, as a community response. Observe what factors are involved in sexual harassment situations on public transport (area, time, traffic, space, etc.).

LA5 Measures

- 5.1. Websites, mobile applications and collective forums
- Promote an anonymous virtual mailbox for reporting sexual violence to count harassment that is experienced or detected on public transport, but which does not initiate an administrative procedure.
- Incorporate a communications tool or a digital application for users to report any sexual harassment situation, and therefore enabling quick action by surveillance officers.
- 5.2. Digitisation of assaults and hotspot
- Mapping of the stations or transports where sexual harassment is most reported in order to design specific measures.
- Creation of a register of identified and reported harassments.

6. Calendar

The timetable presented is the **result of a prioritisation analysis of the measures**. This was done in two phases*:

Phase 1 Precedence and synergy relations

- Precedence relations indicate conditions necessary to initiate measurements.
- Synergy relations indicate measures that benefit from their sequential or parallel development, but do not indicate a condition.

Phase 2 Characterisation of benefits and complexity of measures

Allows prioritising measures without precedence relations between them, according to two criteria:

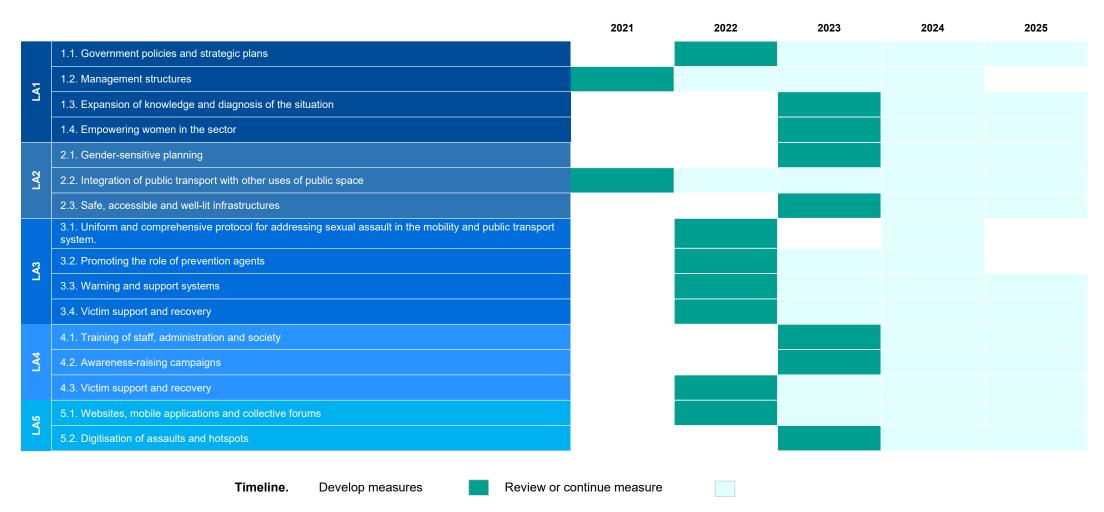

- **Benefits** (alignment with objectives, socioeconomic impact, strategic relevance, etc.)
- Complexity (financial investment, legal constraints, implementation times, technological maturity, etc.)

Phase 3 Implementation timeline

Measures prioritised according to the **logical relations** between them and their **degree of return and complexity**.

6. Calendar

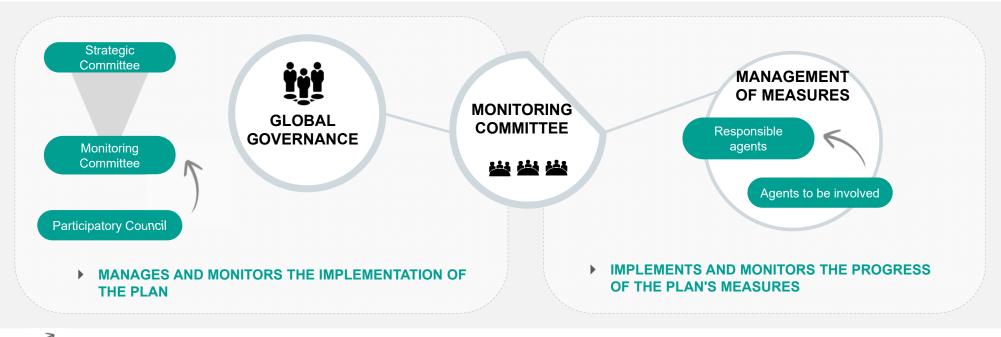

The measures cannot be implemented simultaneously. The following is a **proposed timeline for implementation** over the next few years.

7. Definition of governance

In order to promote the implementation and monitor the plan's different lines of action, it is essential to have **specific governance** to **oversee the deployment** of the measures and to **coordinate the efforts** of the responsible agents.

The governance of the plan is expected to consist of two levels.

Participation channels

Annex - Measures

This annex describes the measures based on the five lines of action:

LA1. Governance

Line of action 1 (LA1). Governance **Measure 1.1** Government policies and strategic plans Responsible agents Develop strategies and policies to promote initiatives that eliminate gender gaps in the mobility sector in general Description and in public transport. These actions, proposed by governments, institutions and transport authorities, respond to Government of Catalonia the need for gender-sensitive planning and design of transport mobility and connectivity. Autoritat del Transport Metropolità (ATM) Improve the inclusivity of the public transport system. Prevent sexual harassment on public transport. **Involved agents Purpose** Improve women's perception of safety in mobility. Address the specific needs of women. Other agents responsible for mobility planning and management (DIBA, AMB, etc.) Main city councils Public transport operators a. Work together with operators to incorporate a gender-sensitive planning process and include targets for Estimated total cost of implementation gender equality. b. Include gender impact assessments in all mobility and public transport plans and measures. €100,000/m2 Actions to be c. Include gender clauses in public tenders, at least the requirement of an equality plan, a sexual harassment carried out prevention protocol and specific training in gender equality for subcontracted security personnel. d. Have a team of specialists to support gender mainstreaming in future projects in the transport and infrastructure sector **Timeframe** 2021 2022 2023 2024 2025 (years) Review or continue measure Timeline. Develop measure

Actions to be carried out	Set up a Monitoring Committee sexual assaults in the mobility and internally to deal with the techn Protocol and producing the annual producing the producing the annual pro	d public transport system, and e ical aspects. Among other du	€30,000/m2						
Timeframe (years)	2021 2022	2023	2024	2025					

Line of action	1 (LA1). Governance									
Measure 1.3	Expansion of knowledge and diagnosis of the situation									
Description	Provide a knowledge base to serve as a tool to improve the quality of women's travel experience. Guide public transport management at the forefront of gender-informed mobility policy-making at the grassroots level. Identify and produce information to characterise sexual harassment on public transport, and produce proposals and recommendations for eliminating sexual harassment.	Responsible agents Government of Catalonia Autoritat del Transport Metropolità (ATM)								
Purpose	 Understand women's mobility patterns and travel experience in relation to sexual harassment. Plan transport taking into account women's needs. Implement action plans to reduce harassment against women in the public transport system. 	Other agents responsible for mobility planning and management (DIBA, AMB, etc.)								
Actions to be carried out	 a. Conduct regular surveys to obtain information on users' mobility patterns of different modes of public transport and to analyse journeys between different groups. b. Have reporting and monitoring tools to see how the policies implemented against sexual harassment evolve. These include conducting regular surveys to characterise sexual harassment on public transport and to obtain qualitative and quantitative information on the characterisation of sexual harassment. The papers should provide information on the challenges of sexual harassment in relation to violence against women and help to produce intervention proposals and public policy recommendations. c. Analysis of the mobility of women and the most vulnerable groups in order to regularly identify critical points of the public transport system. 	• Main city councils • Transport operators Estimated total cost of implementation €250,000/m2								
Timeframe (years)	2021 2022 2023 2024 2025									

Line of action 1 (LA1). Governance										
Measure 1.4	Empowering women in the sector									
Description	Strengthen capacities and presence, and create opportunities for women, both individually and collectively. The aim is to enable them to participate, on equal terms, in access to resources, recognition and decision-making in the planning and management of the public transport sector. Specifically, initiatives to incorporate recognition and appreciation of women's contributions to the transport sector and to ensure that women's voices are represented in the workplace and in transport planning decisions.	Responsible agents Government of Catalonia Autoritat del Transport Metropolità (ATM)								
Purpose	 Strengthen women's capacities and presence. Create opportunities for women, individually or as a collective, to be able to participate on equal terms in accessing resources. Create opportunities to participate in decision-making and in the planning and management of the public transport sector. 	Involved agents Other agents responsible for mobility planning and management (DIBA, AMB, etc.) Main city councils								
Actions to be carried out	 a. Design specific protection measures against sexual harassment for female public transport workers who may experience sexual harassment by a co-worker or a user of the service. b. Create a network for women in the mobility sector to promote empowerment measures, with the aim of sharing challenges and seeking solutions. c. Launch a campaign to raise the visibility of women in the transport and mobility sector. d. Hold and promote conferences to empower women in transport and promote discussions on the role of women in mobility and the impact on their daily lives. 	• Transport operators Estimated total cost of implementation €200,000/m2								
Timeframe (years)	2021 2022 2023 2024 2025
